Carburetor Mounting Gasket  <i><b>Note</b> – On V8 engines equipped with 4 barrel carburetors, there is a big difference between the Carburetor Mounting Gaskets designed to work with wider stock Autolite Carburetors Gasket and the narrower aftermarket Carburetor Gasket. Using the wrong Gasket combination will result in a vacuum leak and rough running engine. <u>Not all square bores flange gaskets are the same!</u></i>	Fel-pro	5462		Autolite 1100, 1V, Carb to Spacer. 1960-65
